About Us

What We Do

Free/Near-Free Community STEM & Programming Workshops

Why We Do

Vision:

“Fostering the growth of our technology community by providing not-for-profit, volunteer based, STEM workshops.”

WHAT: Share and Teach,

by providing the opportunities for locals (from kids, to tech-learners and IT professionals) to learn new technologies and programming languages.

HOW: Connect and Grow

Connect local IT experts from our technical community to community-learners and facilitate the sharing of their knowledge with the community – and in doing so grow the technical creative capacity of our community.

Who We Target

Who (groups)

Targeted Workshops

Kids:

Kids Series

Technical Learners:

Learner Series
